User Profile

User Profile page has the user preferences and settings for Exchange.

User can change these settings from this page.

The profile has the following data:

EmailAddress: read only email address for the user.

First Name: the first name for the user.

Last Name: the last name for the user.

Title: the preferred title of the user

Date format: the date format that will show up on every date in the application. If the user wants to change the date format, they should change it from this profile setting.

Receive Emails: if the user wants to receive any email from Exchange or not.
